Project ID: PP_SCM-M004A04-2004 - MEDA

Project type and round	MEDA SCM 2004 Pilot Project, round of February
Target country(ies)	PS
Subject area	T820 - Education and Teacher Training
Title	Capacity Building in Social Science Methodology for Palestine
Objective	Sending European academic experts to Birzeit for teaching and curriculum development in social science methodology and to that effect establishing a critical survey of existing social science programmes in Palestinian universities in accordance with the Bologna process and the EHEA criteria.
Outcomes	<p>1) Course proposals in the social sciences in the broadest sense with specific consideration of local conditions; 2) Improving the quantity and quality of social science programmes at the post-graduate level in Palestinian universities; 3) Offering a comprehensive graduate programme of social science methodologies for 30-35 Palestinian students, who will be granted an acknowledged certificate. 4) Producing a draft proposal for a methodology course for possible adoption by Birzeit and other Palestinian universities; 5) Laying the groundwork for further cooperation between Palestinian universities and EU partner institutions.</p> <p>It is the intention of the consortium to make a major contribution to capacity building for Palestinian social scientists involved in teaching and the professions. For this purpose, some of the best European and Palestinian expertise has been mobilised in order to develop training programmes applicable to a range of social sciences and the humanities. This will be achieved through: a) a series of test and training courses for advanced students at Birzeit university; b) a critical survey of existing teaching capacities in Palestinian universities; c) the dissemination of the survey results in published form among concerned academic units, governmental institutions, and NGOs. The combined results of this SCM project will constitute the decisive basis for a subsequent JEP proposal by an enlarged consortium.</p> <p>This programme is in the interest of both the European and the Mediterranean partners. On the one hand, it will substantially increase capacities and strengthen compatibility in Palestine with European scientific and teaching norms in line with the Bologna process. On the other hand, it will promote the reciprocal transfer of knowledge and mutual understanding of academic practices. Both activities will contribute to overcoming institutional asymmetries and cultural misunderstandings.</p>

Project ID: SM_SCM-M011B04-2004 - MEDA

Project type and round	MEDA SCM 2004 Structural Measures, round of October
Target country(ies)	PS
Subject area	T932 - Internal quality ass. systems, based on the dev.of abilities for self-ass. in the univ. at all level
Title	Quality Assurance and Improvement in Tertiary Education
Objective	a. Training of the Staff of the Accreditation and Quality Assurance Commission (AQAC); b. Training of the Members of the AQAC; c. Training of the Quality Unit representatives from Tertiary Institutions; d. Initiating an academic international network between the trainers (European Academics), AQAC staff and members, and the trainees (Palestinian Academics) of the respective institutions; e. Initiating an academic local network between the AQAC staff and members, and the trainees themselves.
Outcomes	a- The training of 10 Commissioners of the Accreditation and Quality Assurance Commission in the decision-making processes of national quality assurance during the year 2005; b- The AQAC with the trained Commissioners will be able to establish priorities in tertiary education programs which are relative to the labour needs of the Palestinian Territories and which in turn is in line with the National Priorities. c- The training of 3 staff members of the Accreditation and Quality Assurance Commission in the process of institutional accreditation (which has heretofore concentrated on program accreditation), national quality assurance and the promotion of continuous self-evaluation in tertiary institutions during the year 2005; d- The training of representatives of 11 Universities and 25 technical colleges constituting the first staff of the proposed institutional quality units to be established in mid-2005. e- The establishment of a local and international network, such as the creation of quality interest groups in specialised areas of studies f- Embracing the process of institutional accreditation in order to evaluate institutions holistically, and increasing participation in regional and international quality assurance activities and organisations.
